SERVICE INFORMATION LETTER

SERVICE INFORMATION LETTER LG 2/93

(Issue 1, Nov 1/93)

LANDING GEAR CONTROL AND INTERFACE UNITS 6647 SERIES

(Used on A319, A320 and A321 Aircraft)

INTRODUCTION OF EQUIPMENT MODIFICATION NO. 4

1. Description

Modification No. 4 improves the performance of the microprocessor PCB Pt. No. 001LG010340 by introducing two component changes. Modified PCBs are identified by the part number 001LG010450.

Post Mod. No. 4 LGCIUs are functionally identical to, and fully interchangeable with, the pre-Mod units. Pre-Mod. and post-Mod. LGCIUs may be used together on the same aircraft.

2. Implementation

Mod. No. 4 will be introduced by the manufacturer into all new production LGCIUs. Airlines do not need to retro-fit their LGCIU holdings with Mod. No. 4 standard items.

Mod. No. 4 will be incorporated into the LGCIU Component Maintenance Manual, 32-31-39, at the next revision, which is currently in preparation
